

# ZETA-AI Robotic Accountant

# Project Phases

## **Phase 1-** Data Collection, Cleaning, Integration, Management

Data Scope: Europe (44 Countries), G20, G7, OPEC, GCC, Stock Exchanges (S&P 500, FTSE 350, Nikkei 225, Shanghai etc)

## **Phase 2:** Machine Learning, Deep Learning, and Data Analysis

Python, NLP, and LLM

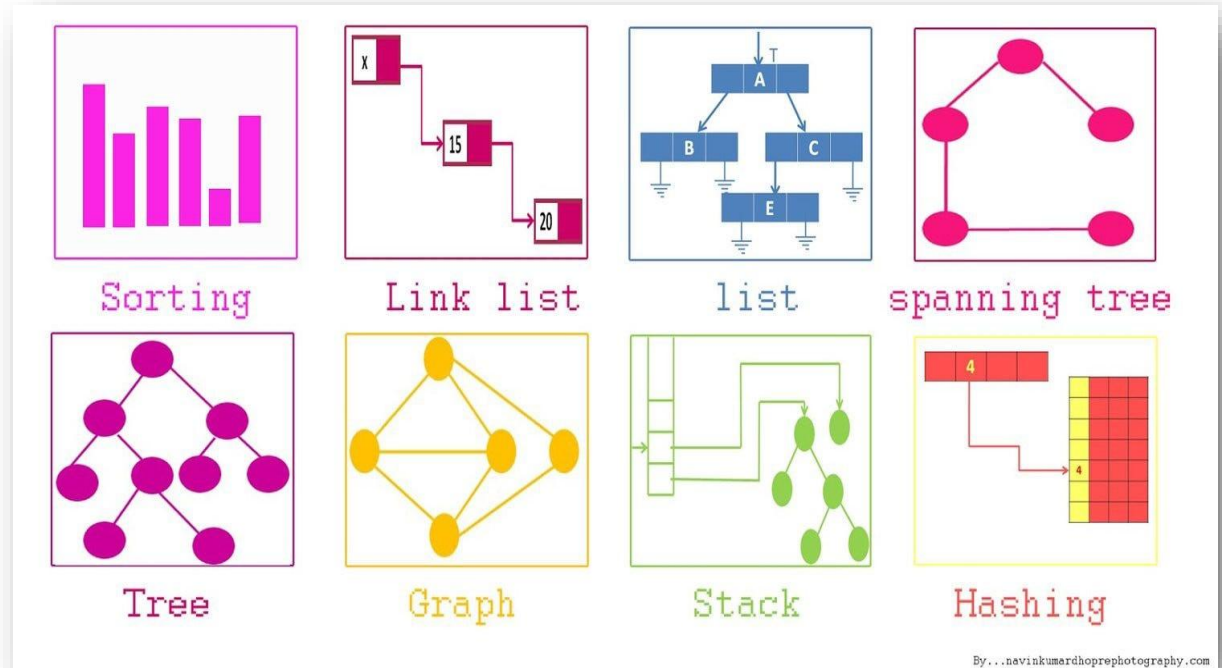

# Project Phases

**Phase 3-** Generating Accounting Algorithms

**Phase 4-** Development of Robotics (RPA)

**Project Duration:** Overall, Two Years

**Phase1-** 3 Months

# Phase 2 (Training)

Python

NPL

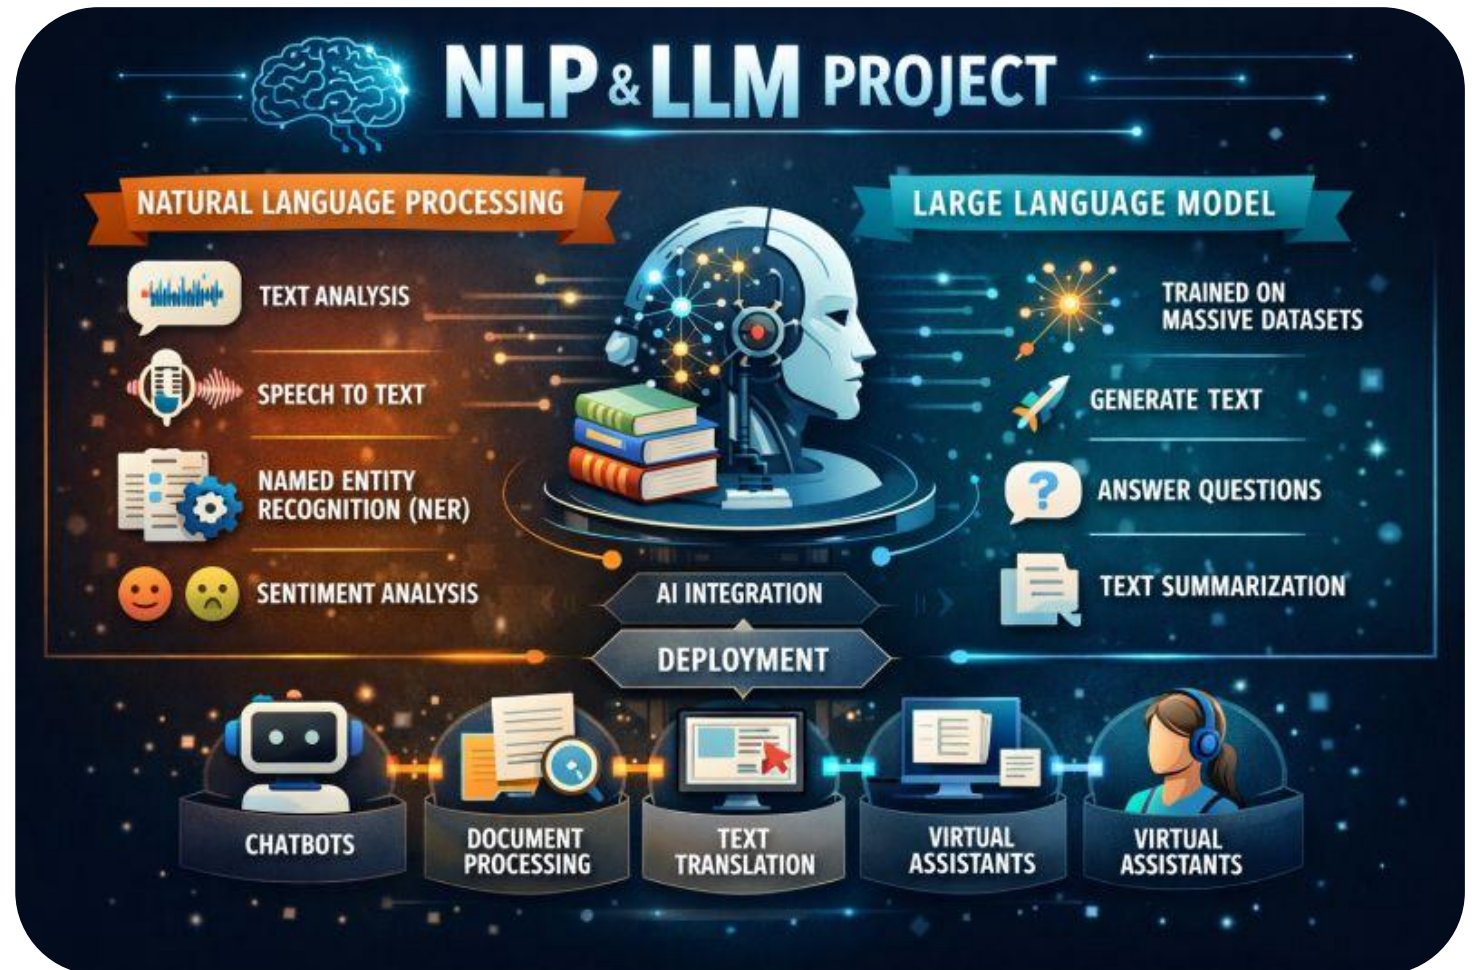

LLM

Econometrics

Machine Learning

Deep Learning

**Progress Review and  
Interview**

# Phase 3

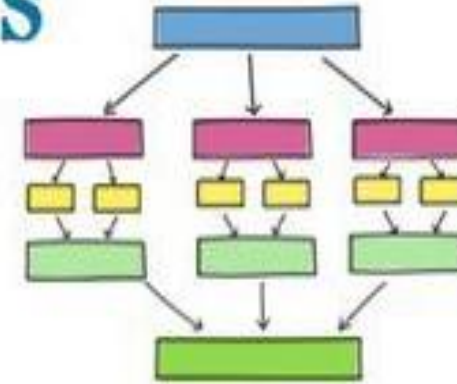

## (Algorithms, Logic, Predictions, Estimations)

- Robotics
- Data Base
- Accountancy Software's
- Research Articles Publications
- Sustainability (ESG) Audits and Assurance- New Field
- Forecasting and Predictions
- Big Data Players
- Others.....

# Algorithms

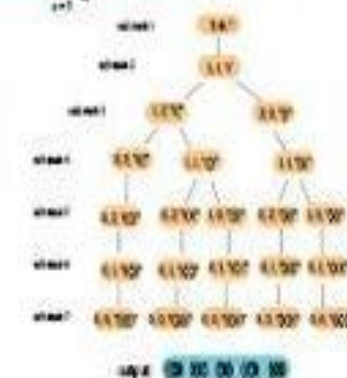

Binary search

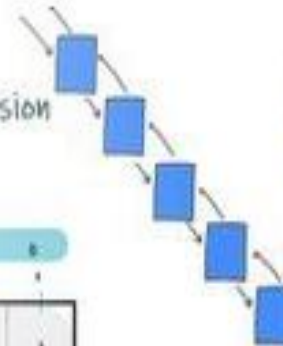

Divide and conquer

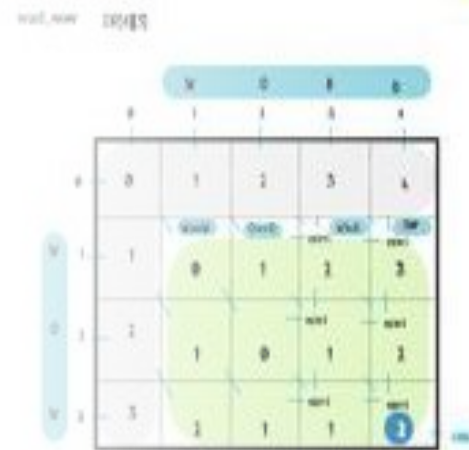

Generate parentheses

Recursion

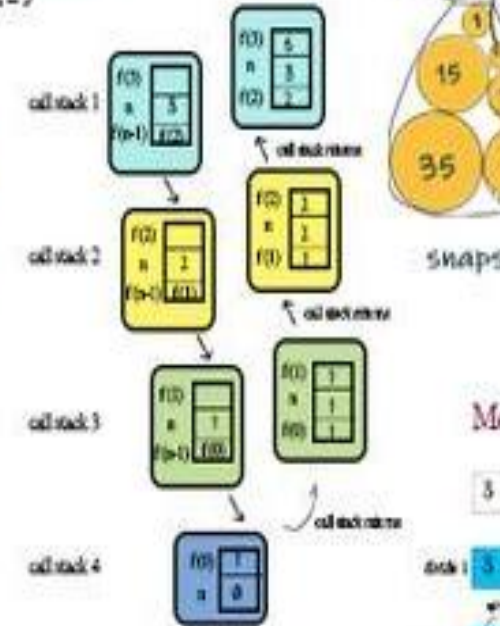

Edit distance

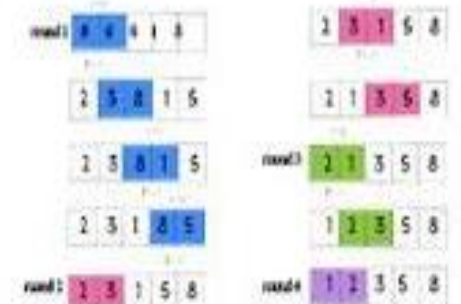

Sorting

Factorial

$$n=3$$

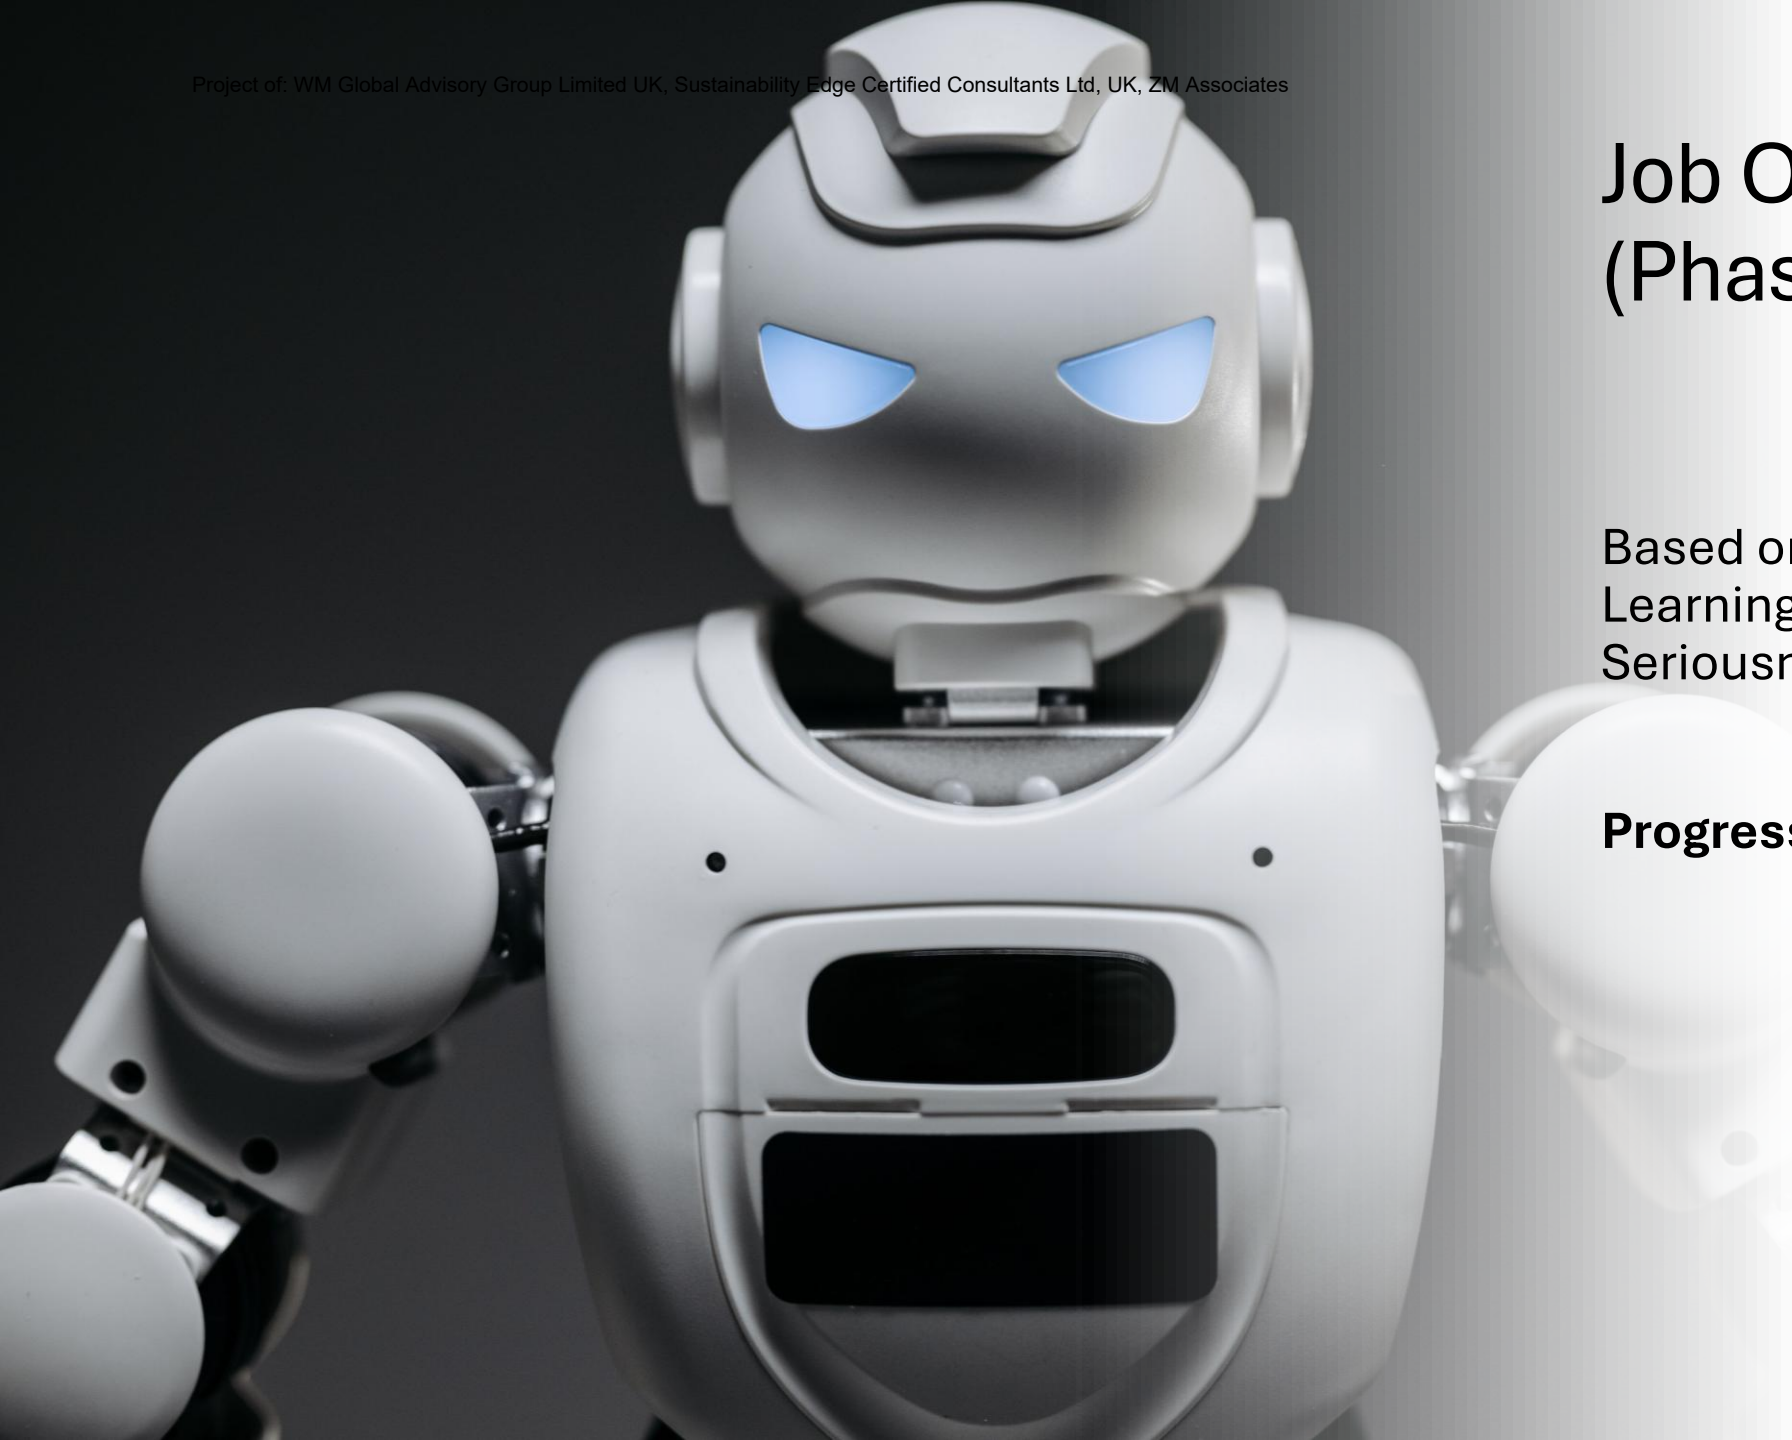

Bubble sort

# Job Offer in UK Labs (Phase 4 (Robotics))

Based on Phase 2 and Phase 3:  
Learning, Commitment, and  
Seriousness

**Progress Review and Interview**

# Phase 1: Data Collection

Seriousness is needed, as its time limited

**We shall create a WhatsApp group for team participants**

**There will be a group leader for each team**

Allocate a country and target to download the financial statements, name the file in the standard format, and keep it in the folder on your laptop and then on your **Google Drive**. (Detailed Guidance will be provided in the training session.)

**You will be an expert** on that country's companies and economic data from the beginning to the end phase.

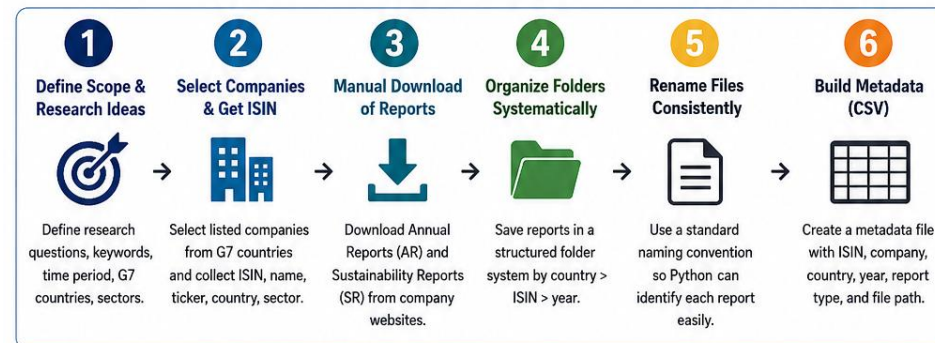

# Details Will be Shared Soon.....

Folder Structure is just an example...

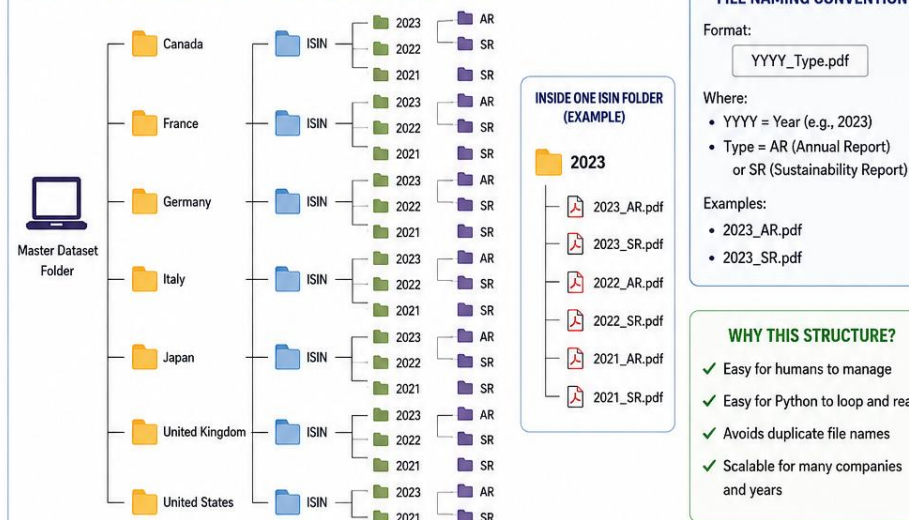

A separate file for the structure will be shared

## PHASE 1: FROM MANUAL COLLECTION TO STRUCTURED METADATA

Step-by-step process for collecting and organizing annual and sustainability reports

### STEP 1-5: FOLDER STRUCTURE & FILE NAMING

### STEP 6: METADATA CSV

| ISIN         | Company_Name         | Ticker | Country | Sector     | Year | Report_Type | File_Path                                                   |

This metadata file becomes the control file for Python reading and later analysis.

Phase 1 Output: Structured folders + standard filenames + metadata.csv
